```
ITGC-AC-01 v1.0.0: test evidence
Reference date 2026-10-19.

Population: 57 active dialog users (state on 2026-10-19).
Segregation of duties: 6 conflicting user/rule pairs found; 1 covered by a valid mitigating
control; 5 exceptions (4 users: AP006, AP007, AP008, GL004).
  - AP006 breaks SOD-P2P-01 (CRITICAL); mitigation: NONE.
  - AP007 breaks SOD-P2P-01 (CRITICAL); mitigation: NONE.
  - AP008 breaks SOD-P2P-01 (CRITICAL); mitigation: NONE.
  - AP008 breaks SOD-P2P-02 (HIGH); mitigation: NONE.
  - GL004 breaks SOD-GL-01 (HIGH); mitigation: EXPIRED.
Dormant privileged users (no login for 90+ days): 2 (AP011, 170 days, MD003, 131 days).

Test result: EXCEPTIONS.
Cross-check: MATCH (capability-indexed recomputation over the same tables (cross-check of logic,
not an independent data source)).
Data version (SHA-256 of the rows read):
6fc2b51487552a0b44683a7152aaba65a89f92d39ae43f59c3da87654c858707.

Sign-off: yaravindan@gmail.com concluded NOT_EFFECTIVE on 2026-10-19; exceptions reviewed: yes.
Comment: Five SoD exception pairs and two dormant privileged users are open; remediation to be
tracked.

This document is test evidence produced by deterministic code over the full population. It is not
an assessment that the control is effective; the conclusion above, where present, is the named
control owner's. It is not audit or legal advice.
